

September 2007

Dear Parents,

We wanted to take this time to inform you of the way we will be giving timed tests in math. Each student will be given a timed test on Tuesday and Thursday. They will have one minute to complete as many problems as they can. The goal is to get 20 problems correct in one minute. When the timed test is sent home, it is expected that each student finish the test and return it the next day. Please practice math facts nightly to help your child achieve the goal.

Thank you in advance for your help!

The Second Grade Team
